

# HandBook

For Just Locate Me

# Introduction

Just Locate Me is a tracking app which has been made with the feeling of security of the people. This app tracks your real time location and shares it with your family and friends. So, whenever your loved ones want to know your whereabouts, they can simply check the app and see your location.

The app is also useful for kids, as parents can always track their location and know if they are safe. Similarly, office going women and college going girls can also share their location with their families, so that they don't have to worry about their safety. Search Me Know is a simple and easy to use app which makes it a must-have for everyone.

# About the Company

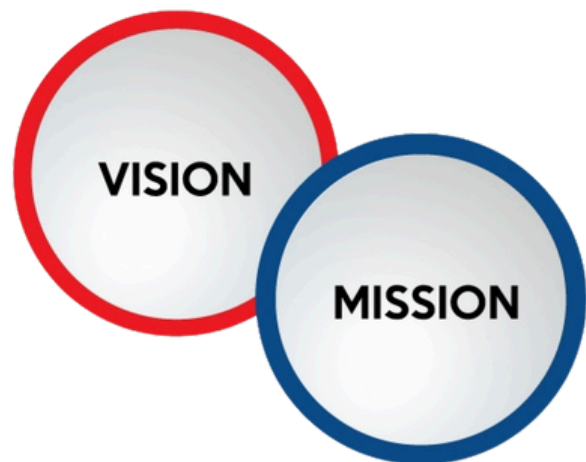

Just Locate Me app has been developed by Liptok India Pvt Ltd.  
All the services of this app are provided by Liptok India Pvt Ltd.

Liptok Media Private Limited is a Private Company incorporated on 02 July 2020.

The founder of the company is **Mr. Deendayal Jakhar**.

## Vision and Mission

Our mission at Just Locate Me is to provide our users with a safe and reliable location tracking app that they can use to keep track of their loved ones. We strive to create a product that is user-friendly and easy to use, so that our users can have peace of mind knowing that their loved ones are always within reach.

# What is Just Locate Me App?

The Just Locate Me app is a great location tracking app which helps you to track live location using GPS technology.

With the help of this app, you can see the real time location of your family members, friends or people who are close to your heart at any time., so you can always be sure they're safe.

with the app's live tracking feature, you can even see where they are in real time, making it easy to stay connected no matter where they are.

## Why we made this app?

**Our main objective behind making this app is to provide security to women, children, elders and all those who are important to you.**

Whenever any member of your house is out, you can know where he is at this time and you can be free from worrying about his safety. Keeping this in mind, we have tried to develop this app.

# This app is useful for the following

## ➤ **Parents**

- You can check the movement of your kids to know where they are
- Whenever your daughter goes out of the house, be it office or college or anywhere else. You can see her location.

## ➤ **For office going women**

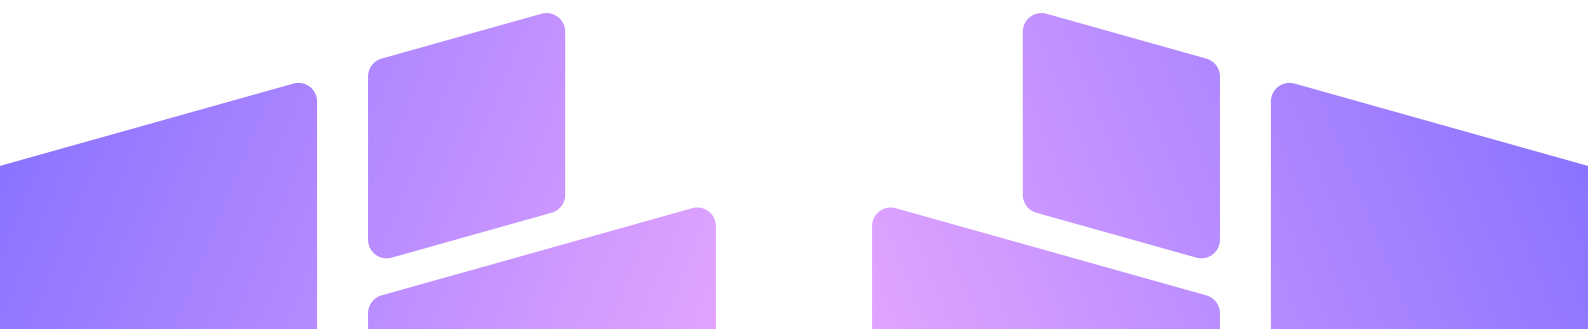

- Whenever you are late for home, your children or husband will be able to track your location and make sure you are safe.

## ➤ **For Childrens**

- In the case of office-going parents, you will be able to track their location in real time to make sure they are safe and to know where they are.

## ➤ **To keep an eye on your office employee**

## ➤ **This app is useful for every person who cares about their loved ones.**

# Why everyone should use Just Locate Me.

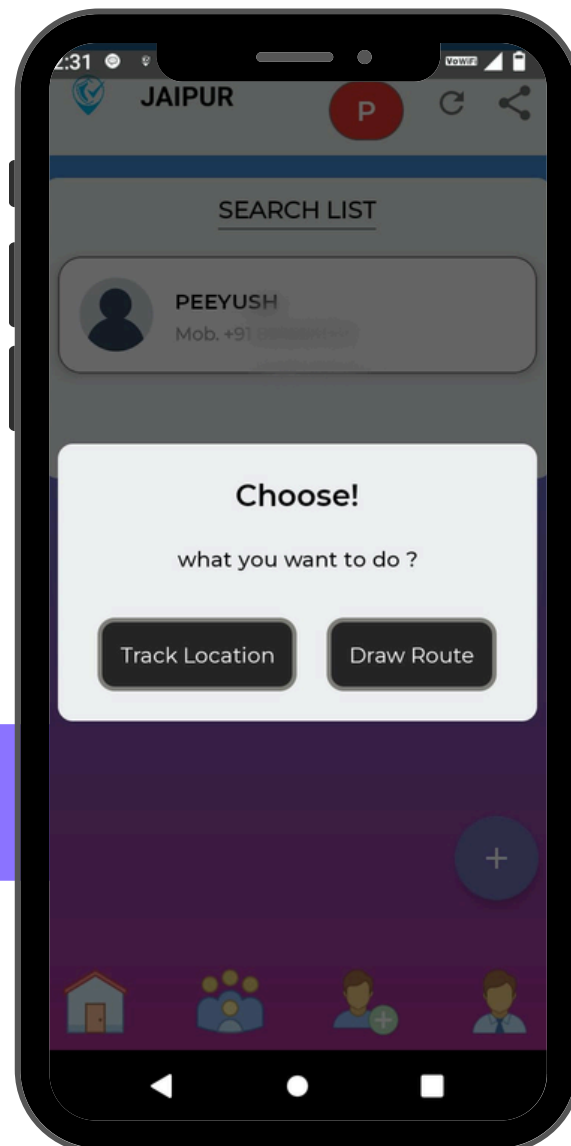

We all have a deep affection for our families especially when it comes to the safety of our beloved friends and family members. As parents, spouses or guardians, it can be difficult to feel secure with our loved ones out of the house.

Fortunately, there is an accessible solution: Just Locate Me, a simple app that allows you to see the live location of your loved ones so you can be worry-free. This app is easy to use and everyone can use it easily.

# App Interface Introduction

# How the App works

This app tracks location using GPS technology.

## Send Location Access Request

The user has to send the request for location access to the person whose location he wants to track.

## Accept Location Request

The second user has to accept the request for location access only then the first user can see the location.

## See The Location

Once the request is accepted then the first user can see the location of the second user.

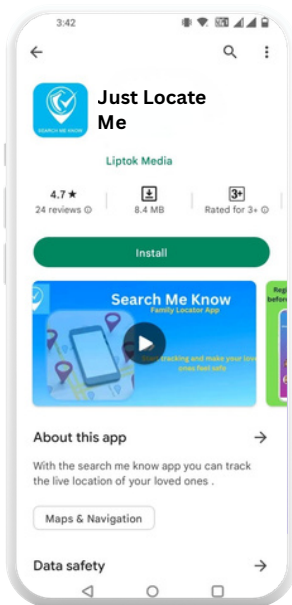

- Note:
1. User 2 can revoke the location access permission at any time.
  2. You can track the location of only one person for free.
  3. To track the location of the next person, you have to pay Rs 149.
  4. By sharing this app, if any person downloads this app with the referral code, then you can track the location of the next person for free.
